

SKY9612 Dome Camera

In a slightly larger package than our black and white dome camera, this color dome camera will really impress you! A full 420 TV lines of resolution, and less than 1 lux minimum resolution make this camera perfect for security applications. A 94 degree lens ensures a wide field of vision, so you don't miss a thing. Even though it's color, this dome is still small enough to remain unobtrusive, and to mount almost anywhere.
